Shark simulator beach killer

Shark Simulator Beach Killer is exactly as it sounds – a simulator that allows you to control a 3D shark in shallow waters and the aim is to attack any living creature and rack up a large number of kills! This game is definitely not for hearted feint and there is a lot of blood and gore so be prepared! The controls are simple - you control the shark using the WASD keys and attack using the space bar. In each game, you are given a series of objectives that you must complete such as killing 5 humans or killing 5 squid. You have a food meter too that dwindles the longer you go without eating your prey – keep an eye on the clock and make sure you don't let your food levels fall too low. There are two different beaches to play and extremely fun graphics and gameplay! Unleash your shark rage today and start attacking! Release date The game was originally released in September 2017. It was updated with a better version in May 2018. Development Shark Simulator Beach Killer developed by HGames.Controls WASD to move Space Bar to Attack 3D action sports driving strategy girl multiple logic MMO The app image is actually a screenshot from the popular game franchise, Sims 3. I highly recommend this app to be taken down immediately or I will put it up EA and Sim Gurus themselves. I'm disappointed that there are also no tutorials for the game. I deleted this app and will NEVER play this again. Thank you, have a nice day. Control: Up Left Down On the right Movement Spacebar Attack A great feature of this game is that it offers both single and multiple player options. Play like a really hungry, angry great white shark. Try to kill everything you can, be it innocent swimming, dolphins, squid and tons of fish. Do everything you can to sabotage the devastation around you. The graphics of the game are very beautiful and the gameplay is quite simple. &t; The game will start after the video
